## 8.1.4 - Policies Documents Regarding preventive immunization For Students, Teachers and Hospital Staff

## VACCINATION POLICY FOR TEACHING FACULTY AND STUDENTS

**Belief statement:** All teaching faculty being the part of health team should reduce the personal risk of infection and reduce the spread of vaccine preventable infections by receiving appropriate vaccines. Recommendations within this policy are in accordance with the Centers for Disease Control and Prevention (CDC) guideline for Immunization of Health-Care Personnel.

1. All the faculty members should be up to date with the immunization as recommended in the Indian national immunization schedules.
2. In view of preventing outbreaks of vaccine preventable diseases newly hired faculty and first year students during admission are recommended to ensure the completion of immunization of such diseases.
3. Post-exposure prophylaxis should be strictly observed by the exposed faculty in the events of such occurrence in the clinical settings during student supervision.
4. All vaccination policies followed in this institution will be consistent with state and federal laws that may occur prior to policy updates.
5. Institution will make provision of Hepatitis vaccine and other vaccines according to the government updates for both the first year students in the undergraduate and postgraduate programme.
